THE 7 LAWS

THE 7 UNIVERSAL LAWS

H ave you ever heard of the The 7 Universal Laws of the Universe? You are governed by natural laws, like gravity, and there are the 7 Universal Laws of the Universe also. Everything in the Universe is governed by these laws and that includes you too.

The balance and harmony throughout the Cosmos is governed by these 7 Universal Laws of the Universe. And each one holds an important key to help you create balance and harmony within yourself and your own life.

discover the inherent power hiding within you and learn how to control your environment and everything within it.

MASTER ENERGY & MASTER EVERYTHING

When you awaken this power and understand how it operates, you become the master of your own existence. However this doesn't involve any sort of spell or magic. It's just the proper application of science.

To understand the secrets of the Universe think in terms of energy, frequency and vibration.

Ancient mystical and esoteric groups all use these 7 Universal Laws of the Universe at the core of their teachings. These 7 Universal Laws of the Universe can be traced back over 7,000 years. To the ancients of Egypt, Greece and the Vedic traditions of India. So this is not new knowledge. It's ancient wisdom.

Understand these 7 Universal Laws of the Universe and you will have the wisdom to influence your environment. Which will allow you to take charge of your direction in life while choosing how you experience the journey.

IMMUTABLE & MUTABLE LAWS

changed. They are eternal Laws which are absolute. They can not be changed or avoided as they have always existed and will always exist. The first three of the 7 Universal Laws of the Universe are immutable Laws.

Mutable - The Mutable Laws are those Universal laws which are liable to change. They are the laws which can be transcended completely or changed slightly. They are just as important as the immutable Laws as they also govern your existence.

To take complete control over your life you must first master your own existence. Make it your goal to master each of the 7 Universal Laws of the Universe. And work towards taking absolute control over your being and you will begin to understand the true meaning of freedom.

THE 7 UNIVERSAL LAWS OF THE UNIVERSE

A Summary of the 7 Universal Laws of the Universe

THE LAW OF MENTALISM

This law is 'Immutable' and can not be changed

The 1st of the 7 Universal Laws tells us that '*Everything is mind; The Universe is Mental*'. Everything we see and experience in our physical world originates from the invisible, mental realm. It tells us that there is a single Universal Consciousness, '*The Universal Mind*', from which all things manifest.

Universal Mind. That is the reality we exist within.

Your mind is therefore of course *part* of this same Universal Mind. The only difference between your mind and the Universal Mind being a matter of degree. Your entire reality is a manifestation of your own mind. The mind is everything. What you think, you become.

THE LAW OF CORRESPONDENCE

This law is 'Immutable' and can not be changed

The 2nd of the 7 Universal Laws tells us '*As above, so below; as below, so above*'. This means that there is '*harmony, agreement and correspondence*' between the physical, mental and spiritual realms. Meaning what is created in one effects the other.

The energy you create while on earth (below) automatically projects upwards (above) which is then returned to you (As above, so below). You create energy with your emotions, feelings, thoughts, desires and impulses.

And when you choose to experience such things, you send out an energetic signal that attracts the same energy back to you. The energy you attract matches the energy of your emotions, feelings, thoughts, desires and impulses.

This is the nature of '*As above, so below; as below, so above*'.

There is no separation since everything in the Universe is connected. Everything originates from the same One True Source. The same pattern is expressed on all planes of existence from the smallest electron to the largest star and vice versa.

All is One.

The Ancient Greek Temple of Apollo at Delphi referred to the '*Law of Correspondence*' in the inscription.

One of these mysteries is that you are part of god because all is one. God is not only outside you. God is within you. It is both within you and everywhere. It is you. You are the manifestation of God. Learn to channel your energy inwards and you will awaken the sleeping God that you were born to be.

THE LAW OF VIBRATION

This law is 'Immutable' and can not be changed

The 3rd of the 7 Universal Laws of the Universe tells us that everything is energy. And energy is never stagnant. '*Nothing rests, everything moves, and everything vibrates*'.

The third and last of the immutable Universal Laws tells us that '*the whole universe is in vibration*' and science has already confirmed that everything in the Universe, including you, is pure energy vibrating at different frequencies. As the famous scientist Nikola Tesla has been quoted saying:

"To understand the secrets of the Universe, think in terms of energy, frequency and vibration".

The axiom that '*like energy attracts like energy*', upon which the Law of Attraction is based, has it's foundation in this Law. All the information we receive using our five physical senses is conveyed to us through vibration.

The same applies to your thoughts, emotions, feelings and life experiences. All of these are simply different frequencies, or different vibrations of energy.

Everything is energy, including everything about you. And when you understand energy and learn how to control and apply it, you will learn what true freedom really means.

The lowest of your emotions is hate. Which exists on the lowest and densest end of the spectrum. Unconditional love is the polar opposite of hate and is the highest vibration of emotion on the spectrum.

are able to choose what exact energies are returned to you.

By this you can decide on how you wish to experience life.

You are part of God. You are part of the creator and the creator works through you. Everything you experience in your life is a creation of the same Universal Mind which you are an intrinsic part of. Your mind literally creates your reality. What reality you choose is up to only you.

THE LAW OF POLARITY

This law is 'Mutable' and can be changed

The 4th of the 7 Universal Laws tells us that '*Everything exists in duality, everything has poles, everything has its opposite, however opposites are identical in their nature and different only in degree*'.

It is also the first of the mutable or transcend-able Universal Laws, meaning they are laws you can learn to rise above. For example, you can choose not to live your life stuck in duality.

While this means that there are two sides to everything, or two extreme ends of the same spectrum, things that appear as opposites are in fact only two extremes of the same spectrum. They are, by nature, the same thing. For example...

Heat and cold may appear to be opposites at first glance. But in truth they are simply varying degrees of the same thing, temperature.

The same applies to love and hate, peace and war, darkness and light, positive and negative, good and evil, energy and matter. Each of these things, while opposites, are by their nature the same. Each polar opposite is merely a different degree of the same thing.

You can transform your thoughts from hate to love or from fear to courage. You can do this by consciously raising and changing the vibration of your body. This changes your energy field using a process known as the *Art of Polarization*.

This Principle of Duality may appear to be very real in your life but it operates only in the physical and mental realms, not in the spiritual realm where All is One, so you can transcend it and be no part of it.

of which you are a part of behind your every thought, statement and action, and by always focusing on the lesson of the experience while being in a state of neutrality, even when things appear to be going '*bad*', in time you will rise above the Law of Polarity which currently governs most of the human species.

THE LAW OF RHYTHM

This law is 'Mutable' and can be changed

The 5th of the 7 Universal Laws tells us that '*Everything flows, everything has its tides, all things rise and fall, a pendulum that swings to the right swings to the left in equal measure, what goes up must come down, rhythm compensates.*'

This principle can be seen in operation in the waves of the ocean, in the cycle of the sun and moon, in the rise and fall of the greatest empires, in the swaying of your thoughts from being positive to negative and in your personal successes and failures throughout the ongoing cycles of your life.

In accordance with this Law, when anything reaches a point of culmination then the backward swing begins almost without being noticeable until such time that any forward movement has been totally reversed, then the forward movement begins again and the process is repeated.

Everything in the Universe, the Earth and your life are effected by cycles which continue to repeat themselves until you reach an understanding as to what these cycles are trying to show you.

When you become aware of such tide like cycles, which also influence your relationships and life experiences, you will gain valuable insight into yourself as you transcend the influence of such cycles.

To transcend the tide cycle pulling you back as you try to advance forward, you must become aware of when the tide starts to pull you back in any of your endeavors, whether you are improving your health, your finances, your relationships or any other goal you may set in motion.

You are one with the Omnipotent Universal Mind and are the incarnation of The One True Source, making everything possible.

Whatever your endeavor may be, keep focused on your outcome and remain positive no matter how far back the tide pulls you. Keep your focus on the shore in front of you and not on the tide pulling you back. The tide must come back in with time and your efforts will be rewarded when the rhythm of the tide starts it's opposite motion again.

In time and with awareness and practise you will transcend this Universal Law and your determination will be rewarded as the backward movements of the tide become less negative in how they effect you and hold you back.

You will essentially be raising your vibration higher and higher until you can manifest the reality you desire with relative ease. No matter what negative tides may be pulling you back.

THE LAW OF CAUSE AND EFFECT

This law is 'Mutable' and can be changed

The 6th of the 7 Universal Laws tells us that '*Every cause has an effect, every effect has its cause, and every action has its reaction.*'

In accordance with this Law, every effect you see in the outside world, or your outside physical reality, has a very specific cause which has its origin in your inner or mental world.

'As above, so below, as within, so without'.

This is the nature of the power of your mind. By selecting which thoughts you will project, and by choosing which feelings reinforce those thoughts, you determine your reality. As you will attract the same energy of the thoughts and emotions you choose to express. If one desires true love for instance, one must first feel true love to attract true love.

Every one of your thoughts, words, emotions or actions sets an energy in motion which will come to materialize in time. To master yourself you must master your mind for everything in your reality is the creation of mind.

capability to change their reality. Such people are slaves to their circumstances.

Luck simply does not exist in the Universe. Luck is a man-made concept and is nothing more than the illusionary product of cause and effect. The idea of someone being lucky is a term used by those who are ignorant to the Universal Law of Cause and Effect.

Until you make the unconscious conscious, the Law of Cause and Effect will continue to direct your life. And you will call it luck or fate.

The Law of Cause and Effect applies on all three planes of existence, the spiritual, the mental and the physical.

The difference is that on the spiritual plane cause and effect are instantaneous. So cause and effect appears inseparable. Whereas on the other planes, our concept of time and space creates a time delay between the cause and the eventual effect.

When you focus on your chosen desire with intention using creative visualization, what you want to create in the physical world is automatically manifested in the spiritual world.

And ‘as above, so below’, this desire will come to manifest in your physical reality in time. And the more energy and belief you give to this process the more effective and successful it will be.

With perseverance, practice and continued concentrated thought you will learn to train yourself to materialize what you desire in the physical world much quicker.

As you improve your connection to your spiritual body you are able to manifest your desires on the physical plane in much quicker time.

If your life is a blank wall, your mind is the projector. What your mind projects is the experience you call life.

THE LAW OF GENDER

This law is 'Mutable' and can be changed

The last of the 7 Universal Laws tells us that '*Gender is in everything, everything has its masculine and feminine aspects*'.

Truly the biggest upset to have inflicted humanity was when man and woman lost touch with their Feminine Divinity.

This Universal Law of Gender is evident throughout creation in the so-called opposite sexes. Which are found in human beings, in plants, minerals, electrons, magnetic poles and throughout nature, for example.

Everything and everyone contains both masculine and feminine elements. Among the outward expressions of the feminine qualities are love, patience, intuition and gentleness. And the masculine qualities are energy, self reliance, logic and intellect.

Within every woman lies all the qualities of a man. And within every man lies all the qualities of a woman. To be a complete being, one must balance the expression of their masculine and feminine qualities. And live in harmony with themselves and their environment.
